Fittings Insulation

Fittings Insulation are designed in the compliance of the customer requirements and following applicable standards.

Advantages

Our prefabricated Insulation come in two sections that fit perfectly. They are made in a grand variety of materials for the wide open range of temperatures and applications, also available in any diameter and thicknesses.

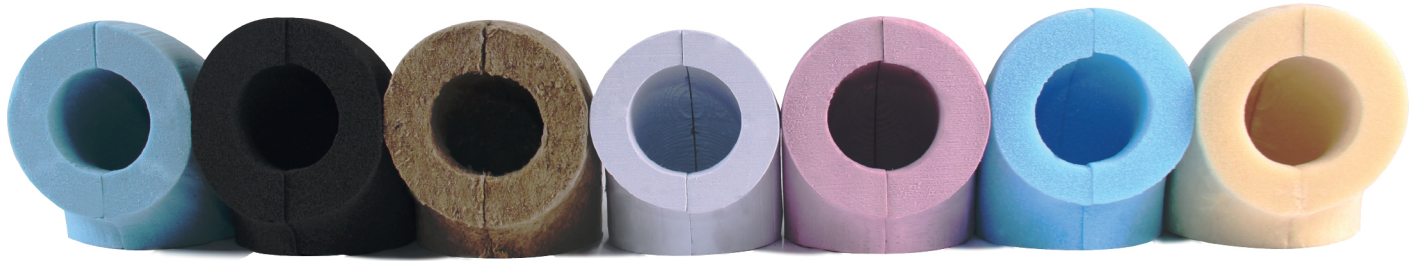

We manufacture fittings insulation for different pipe types as steel, stainless steel, cooper and VictualicTM

These fittings insulation are manufactured according to the ASTM C450 the standard applicable for fabrication of thermal insulating fitting covers for NPS piping.

Available Materials

Cellular Glass, Extruded Polystyrene, Polyisocyanurate, Phenolic, Polyurethane
Calcium Silicate, Expanded Perlite, Mineral Wool

Main Benefits

- Maximum savings in energy & money
- Easy to remove for maintenance
- Any type, size and shape
- Easy to fit
- Quick to install
- Less dust in field location
- Minimize installation time

Most Common Fittings

45° LONG RADIUS ELBOW

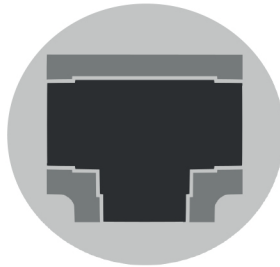

45° SW SHORT RADIUS ELBOW

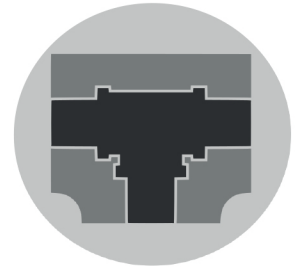

90° LONG RADIUS ELBOW

90° SW SHORT RADIUS ELBOW

BUTT WELD TEE

SOCKET WELD TEE

Available Fittings Insulation

Short and long radius Elbows, Tees, Wyes and Crosses

- Socket Weld
- Butt Weld
- Mechanical Joint
- Victualic™

Pipe Reducers

- Concentric
- Eccentric
- Flanges
- Expansion joints
- Boxes
- End Caps
- Conical Equipment
- And More
